

Track 2 Original ONNX Forward Collage Report

Feedforward Transmission Error Baseline

Styled PDF edition generated from the canonical Markdown analysis report for improved readability, section hierarchy, and table presentation.

Overview

This report evaluates only the recovered paper-original forward ONNX model bank for paper_original_best_Fw . The curve prediction is rebuilt directly from the 19 original target models under reference/rcim_ml_compensation_recovered_assets/models/exact_onnx_paper_release .

Loaded ONNX Targets

The table lists the original release filenames loaded for the 19 paper-best forward targets. Full original ONNX paths are kept in the validation summary YAML.
