

TE Curve Verification Pipeline Familywise ONNX Report - gru_sequence

Feedforward Transmission Error Baseline

Styled PDF edition generated from the canonical Markdown analysis report for improved readability, section hierarchy, and table presentation.

Overview

This report evaluates exported ONNX models from the dataset input-mode retraining program. Each dataset/input-mode section uses dataset-matched held-out test curves and lists the exact model artifacts loaded from `models/`.

Rank-3 temporal ONNX exports are evaluated on the sequence-window test contract stored in each `training_config.snapshot.yaml1`, including `sequence_length`, `sequence_stride`, `sequence_target_position`, and `maximum_sequences_per_curve`. The collage pages keep the measured TE trace at the original full-curve resolution; temporal ONNX predictions are overlaid at the evaluated sequence-target angles.

The report is diagnostic and family-specific. It does not replace an official multi-index model-promotion decision.

Output Artifacts

- output directory: `output/validation_checks/track2_familywise_onnx_report/gru_sequence/2026-07-08-15-30-01__track2_gru_sequence_familywise_onnx_report` ;
- summary YAML: `output/validation_checks/track2_familywise_onnx_report/gru_sequence/2026-07-08-15-30-01__track2_gru_sequence_familywise_onnx_report/track2_familywise_onnx_report_summary.yaml` ;
- model inventory CSV: `output/validation_checks/track2_familywise_onnx_report/gru_sequence/2026-07-08-15-30-01__track2_gru_sequence_familywise_onnx_report/model_inventory.csv` ;
- per-curve metrics CSV: `output/validation_checks/track2_familywise_onnx_report/gru_sequence/2026-07-08-15-30-01__track2_gru_sequence_familywise_onnx_report/per_curve_metrics.csv` .

Simplified Dataset + Setpoints

- dataset: `simplified_dataset` ;
- input mode: `setpoints` ;
- evaluated family: `gru_sequence` ;
- dataset root: `data/simplified_dataset` .

Models Used
