

TE Curve Verification Pipeline Best Model Collage Report

Feedforward Transmission Error Baseline

Styled PDF edition generated from the canonical Markdown analysis report for improved readability, section hierarchy, and table presentation.

Overview

This report compares representative `TE Curve Verification Pipeline` TE-curve predictions for the current best reference, RCIM Model-Bank Reproduction, Wave 1 directional, and Wave 1 global models. Each model is shown as one four-image collage so local oscillation tracking can be inspected directly.

Scope

- each collage contains four deterministic held-out test curves;
- forward models are shown on forward curves only;
- backward models are shown on backward curves only;
- global Wave 1 models are shown on two forward and two backward curves;
- `Measured TE` uses the same line width as predictions and a dark-gray color for balanced visual comparison.

Metrics Summary

Global Accepted Non PINN Incumbent Models

Candidate	Source	Surface	Curve MAE [deg]	Curve RMSE [deg]	Mean Error
<code>accepted_periodic_gru_sequence_global</code>	<code>accepted_non_pinn_incumbent</code>	global	0.001810	0.002141	3.567
<code>accepted_periodic_mlp_harmonic_global</code>	<code>accepted_non_pinn_incumbent</code>	global	0.001734	0.002054	3.385

Global Wave52r Offline Leader Cross Surface Promotion Models

Candidate	Source	Surface	Curve MAE [deg]	Curve RMSE [deg]	Mean Error
<code>wave52r_promotion_h08_global_seed_314159</code>	<code>wave52r_offline_leader_cross_surface_promotion</code>	global	0.001871	0.002204	3.731
<code>wave52r_promotion_k01_global_seed_271828</code>	<code>wave52r_offline_leader_cross_surface_promotion</code>	global	0.001464	0.001738	2.893
