Completion Summary

- the subset exact-paper campaign completed the full `1/1` queue successfully;
- remote artifact sync-back completed successfully and materialized the local log, validation bundle, and validation report;
- the run executed the paper-faithful search path with repository-aligned historical `cross_validate(...)` replay at both wrapper and target levels;
- the subset closeout materialized campaign-level `campaign_leaderboard.yaml`, `campaign_best_run.yaml`, and `campaign_best_run.md` bookkeeping artifacts;
- the parent `20 -run paper-faithful` Track 1 campaign remains canonically `cancelled` and is not reopened by this subset closeout.

Closeout Notes

- this is a subset closeout for the successful `forward + DT + search` bundle launched through the family-stage exact-paper wrapper;
- it is not a canonical full closeout of the parent paper-faithful `20`-run Track 1 campaign;
- no Track 1 benchmark refresh, master-summary refresh, or paper-reference archive refresh is performed here because the parent campaign remains interrupted and incomplete;
- the subset closeout is intended to preserve auditable evidence for the new launcher, logging, and paper-faithful search protocol on one completed family-direction run.
